| These Marks.

**O**NE of our Special Lines is the manufacture of SCYTHES, of which there are two kinds, viz., the Crown or Solid Back, which has the blade and back welded together, and is suitable for rough crops.

The Patent Scythe is made from high-class Sheet Steel, and has the iron back riveted on, and is suitable for clean crops and lawns.

We have been making Scythes over one hundred years, having celebrated our Centenary in 1912, and wherever a Scythe is used the name of W. TYZACK, SONS & TURNER, LTD., in connection with the "ELEPHANT" and "OLD O" Trade Marks, is a guarantee of the very highest quality obtainable.
